The World's Easiest To Use
Metric Conversion Calculator

LIMITED WARRANTY
1-Step Metric warrants this product against defects in materials and workmanship for a period of one (1) year from the date of original consumer purchase in the U.S. If a defect exists during the warranty period, 1-Step Metric will, at its option, either repair or replace the product at no charge. This warranty will not apply if the unit has been misused, abused, altered, or damaged by battery leakage.

DISCLAIMER
1-STEP METRIC MAKES NO WARRANTY OR REPRESENTATION, EITHER EXPRESS OR IMPLIED, WITH RESPECT TO THE PRODUCT'S QUALITY, PERFORMANCE, MERCHANTABILITY, OR FITNESS FOR A PARTICULAR PURPOSE. BUYER ASSUMES ALL RISK AS TO THE QUALITY AND PERFORMANCE. IN NO EVENT WILL 1-STEP METRIC BE LIABLE FOR DIRECT, INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, RESULTING FROM ANY DEFECT IN THE PRODUCT OR ITS DOCUMENTATION. The warranty, disclaimer, and remedies set forth above are exclusive and replace all others, oral or written, expressed or implied.

Some states do not allow the exclusion or limitation of implied warranties or liability for incidental or consequential damages, so the above limitation or exclusion may not apply to you.

REQUESTING SERVICE
Please fill out a Return Request form at <http://www.1-Step.com>.

Thank you for your purchase. We designed this calculator to be the simplest tool for instant metric conversions. If we succeeded, help us grow by telling your friends and coworkers. If you have suggestions or run into problems, let us know so we can improve.

Our sincere thanks to the U.S. Metric Association (www.metric.org) for their help to us and their dedication to the metric system.

Seymour Kaplan
Inventor

WHY METRIC NOW?

because
METRIC IS THE WORLD'S LANGUAGE OF MEASUREMENT
as
ENGLISH IS THE WORLD'S LANGUAGE OF BUSINESS

We live in a metric world. Except for two small countries (Liberia and Myanmar), the rest of the world uses the metric system of measurement. Metric countries are now telling us they can't buy some of our country's products unless the products are produced to the metric system units. It is expensive to maintain two measuring systems, so many of our companies do not export. We must export because our population can't consume all we can produce. If we don't, loss of jobs will follow.

THE 1-STEP METRIC CONVERSION CALCULATOR PRO™ is a unique conversion calculator with the power of a micro-computer that will immediately convert U.S. inch-pound, temperature, length, weight (mass), area, pressure, and volume (cubic & liquid) to metric equivalents and vice versa. It is also a full 4 function, 10 digits + 4 fraction digits calculator with +/-, %, $\sqrt{\quad}$ key; memory, constant and reciprocal function; fraction to decimal and decimal to fraction to the nearest 1/64.

If you can count to 3, you can use **THE 1-STEP METRIC CONVERSION CALCULATOR PRO™** to make over 350 conversions and become METRIC literate the easy way, NOW!

THE 1-STEP METRIC CONVERSION CALCULATOR PRO™
The best tool for teaching and using
Metric -- Decimals -- Fractions

CONVERSION CALCULATOR PRO™ USER INSTRUCTIONS

FEATURES:

- Convert U.S. inch-pound to metric units and vice versa for weight (mass), length, area, volume (cubic & liquid), temperature and pressure.
- Fraction to decimal and decimal to fraction to the nearest 1/64.
- 10 digits + 4 fraction digits display.
- Dual power calculator with memory, percent, square root, sign change, reciprocals, backspace, constant, transfer functions.
- Power Saver. Power automatically turns off 8 minutes after last use.
- Traditional or algebraic operation.
- Modifiable Specific Gravity (SG) to convert between volume, weight (mass) and cm³. Defaults to 1ml=1gram=1cm³.
- Overhead teaching aid available.

BEFORE USING:

- Pull out the protective insulator from the battery compartment.
- Use a pointed object to press the reset button located on the back of the calculator. This will initialize the microcomputer of the calculator.
- Press and hold the AC/ON key to turn the calculator on.

Note: Remembering the reset button is important.

REPLACING BATTERY:

- Remove the screw on the battery cover.
- Remove the old battery.
- Place one new 357A (or equivalent) button-cell correctly in place. Make sure that the polarity (+) of the battery faces up.
- Replace the battery door and screw gently.
- Use a pointed object to press the reset button located on the back of the calculator.

DISPLAY FUNCTIONS:

vol weight length area cubic temp pressure DECIMAL FRACTION
Indicate the selected conversion unit.

M.....	Memory content indicator.
-.....	Negative sign indicator.
E.....	Conversion overflow or calculation error indicator.
DECIMAL.....	Indicates decimal operation.
FRACTION.....	Indicates fraction operation.
*.....	Indicates specific gravity operation in progress.
AOS.....	Indicates algebraic operation.
Error.....	Indicates calculation error.
O'flo.....	Indicates conversion overflow.

KEY	FUNCTIONS:	KEY	FUNCTIONS:
AC/ON.....	Turns Calculator On	DEC/FRAC.....	Switches between decimal and fraction display modes
OFF.....	Turns Calculator Off	SPACE/SLASH.....	Inputs a space or a slash when entering fractions
CE/C.....	Clears the data and the pending operation	sg.....	Recalls and sets Specific Gravity for weight, liquid volume, and cubic volume conversions. Switches between Traditional and Algebraic modes
M+.....	Adds to memory	BACK SPACE.....	Corrects wrong input
M-.....	Subtracts from memory		
MRC.....	Recalls memory and clears memory (If you do not clear memory before turning the calculator off, the data will be retained in memory and could be used in your next calculation)		

Conversions:

To perform conversions: Input the number of units to be converted to another unit. Press the key of the unit to be converted. Then press the key of the unit in which you want your answer. **For example:** to convert 4 quarts into liters:
Step 1: Enter (4) **Step 2: Press** (qt) key **Step 3: Press** (L) key
Results: The display will show the number 3.785411784 and the volume mode indicator.

The following examples only include the necessary keystrokes in the form of text and not buttons like the example above.

More Examples:	Keystrokes	Display
Volume Conversions: 16 cups TO gals You can also continue to convert straight to liters: 1 gal TO liters 3.785411784 liters TO tablespoons 123 cups TO gals 7.6875 gals TO cups "ALL CLEAR"	Enter 16 Press cup Press gal Press L Press tbsp Enter 123 Press cup Press gal Press cup Press AC/ON	1 3.785411784 256 7.6875 123 0
Length Conversions: 75 miles TO kilometers 12 kilometers TO gals	Enter 75 Press mi Press km Enter 12 Press km Press gal	120.7008 Error
Note: If a conversion from (for example) kilometers to gallons is attempted, the calculator will display 'Error' for approx. 3 seconds and will then return to the state before the error occurred. You may then resume with further length conversions.		
Note: If a conversion is done that converts to a value greater than 9999999999, a conversion overflow will occur and the "oFlo" will be displayed for approx. 3 seconds.		
750000 miles TO kilometers 1207008 kilometers TO inches	Enter 750000 Press mi Press km Press in	1207008 o'Flo
Note: After the 3 second "oFlo" display, the calculator returns to the state before the overflow error occurred. You may then resume with further conversions.		
1207008 kilometers TO miles	Press mi	750000
Pressure Conversions: 1 psi TO kpa	Enter 1 Press psi Press kpa	6.894757185
FRACTION TO DECIMAL, DECIMAL TO FRACTION to nearest 1/64 EXAMPLES: 2 1/2 + 3 1/5 5.6875 TO FRACTION 12 ÷ 5 2.25/64 TO DECIMAL	Enter 2 Space/Slash 1 Space/Slash 2 + 3 Space/Slash 1 Space/Slash 5 Press = Press DEC/FRAC Press = Enter 12 ÷ 5 = Press DEC/FRAC	5.7 5 11/16 2 25/64 2.4
To change your decimal result to a fraction: Now, all calculation results will be displayed in fractions. For example: 12 ÷ 5 2.25/64 TO DECIMAL		
SG KEY EXAMPLES: 10 liters TO grams View SPECIFIC GRAVITY Set SPECIFIC GRAVITY to 2 10 liters TO grams Reset SPECIFIC GRAVITY	Enter 10 Press L Press g Press AC/ON Press SG Enter 2 Press SG Enter 10 Press L Press g Press AC/ON Press SG Enter 0 Press SG	10000 1 0 20000 0
Note: After pressing SG key, ' * ' will be showed on the display.		
TRADITIONAL CALCULATION EXAMPLES: (12 + 34) X 5 ÷ 2	Enter 12 + 34 X 5 ÷ 2 =	115
ALGEBRAIC CALCULATION EXAMPLES: Press and hold SG (until display shows AOS - can take 10 seconds) 12 + 34 X 5 ÷ 2	Enter 12 + 34 X 5 ÷ 2 =	97
Note: You can return to traditional mode by pressing and holding SG until AOS disappears.
